

ICREX Company Limited / Company brochure

We help customers solve their problems with solution products.

■ Providing solution products

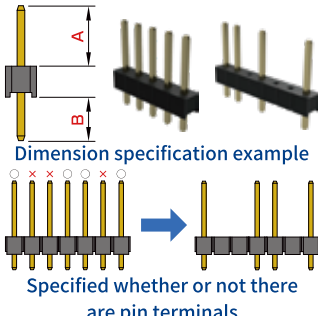

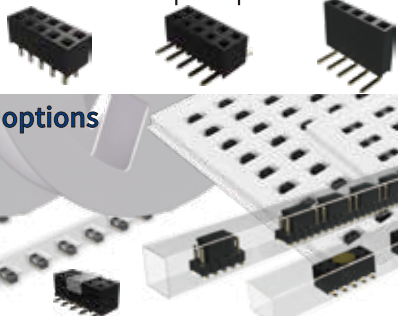

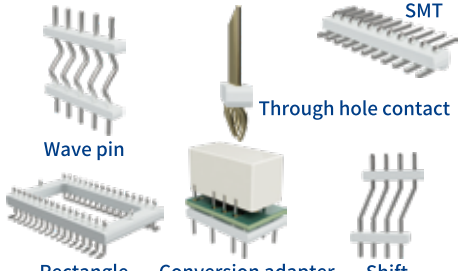

Based on the standard product group that can be developed into customization that ICREX has cultivated to solve electrical and mechanical problems raised by customers, mainly in the method of connecting printed circuit boards, we provide solution products created from three strengths. We will help you find a solution. We strive to provide products that can solve problems faced by customers who say, "I wish I had a part like this." ICREX is always aware of providing solution products and continues to conduct sales, development, and improvement.

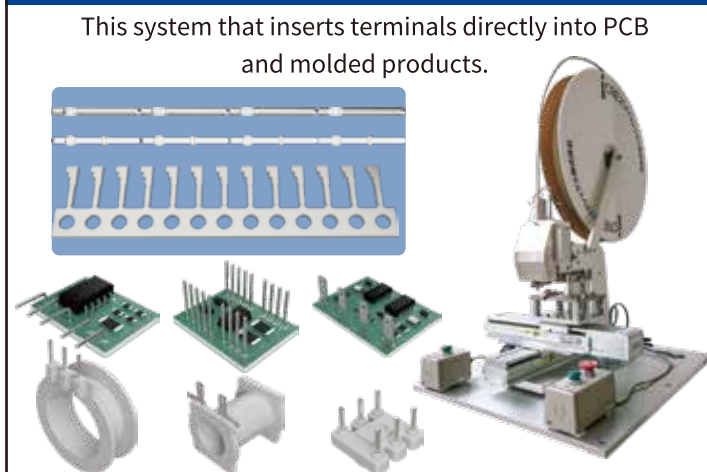

■ Standard product group that forms the basis of custom products

At ICREX, we provide standard products that serve as the basis for a wide variety of custom products as the basis for creating solution products.

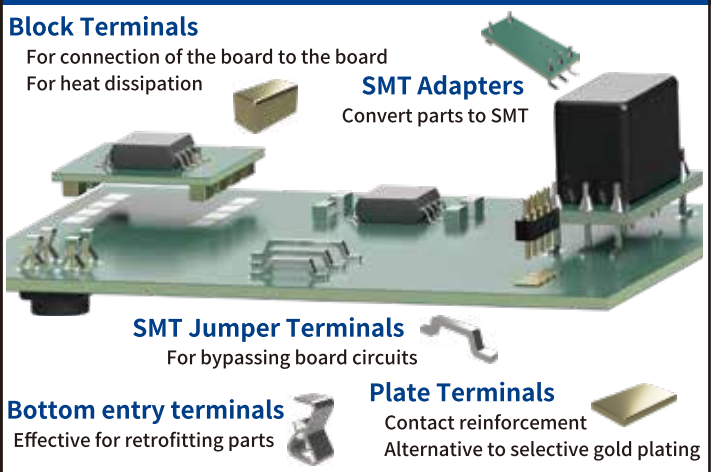

Pin Headers

Semi-Custom Pin Headers	Female Headers	Full Custom Pin Headers
Pin header that allows you to specify dimensions and remove unnecessary pins.  Dimension specification example Specified whether or not there are pin terminals	Socket type pin headers for square pins 	Proposal-type products that help solve board connection problems product examples 

Preform Chain Terminal Insert Systems

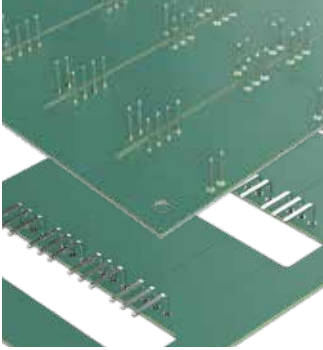

Custom SMT Parts & Components

We help customers solve their problems with solution products.

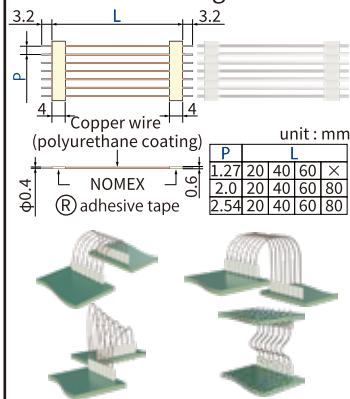

PCB with terminal

This product reduces the post-attachment process of terminals.

Flexible board connectors

Connecting boards together in various configurations

Crimping System

Effective for connecting electric wires

Crimping process image

Pin Terminals

Custom made pin terminals

Assembly Service

Providing terminal manufacturing technology and terminal insertion technology in the form of assembly services

Tube Caps

Effective for protecting parts

Corporate Philosophy

We will create useful value for society with creativity and contribute to a prosperous future.

Contributes to the development of sustainability

"Power to meet our customer needs"

"Power to create new products"

"Power to continue to improve"

About CSR activities

Purpose

The aim of ICREX's CSR activities is to contribute to the development of sustainability through the dissemination of our corporate philosophy "We will create useful value for society with creativity and contribute to a prosperous future."

About our Commitment to CSR

In order to contribute to the development of sustainability (a sustainable society), it is the social responsibility (CSR) initiative of ICREX to continue, improve, and develop activities such as "sound management," "human rights," "labor practices," "the environment," "fair business practices," "customer issues," and "community involvement" through all of its business activities, giving consideration to all stakeholders.

Creation and imagination of custom connecting parts

■ Corporate Profile

Name : ICREX Company Limited

Capital : 50 million yen

Address : 1-11-19, Shinsayama, Sayama-shi, Saitama prefecture 350-1331, Japan

Tel : +81-4-2900-1911 Fax : +81-4-2900-1915

URL : <https://www.icrex.co.jp/>

■ Corporate History

November 1, 1988 AS Engineering Inc. founded in Kawagoe, Saitama prefecture

August 21, 1995 Unitech Inc. founded in Kiyose, Tokyo

October 1, 1999 AS Engineering and Unitech merge for the purposes of business expansion and development.
Relocate to new premises under the new name of ICREX Company Limited. Paid in capital increased to 50 million yen.

August 17, 2011 Relocating to new offices.
